Release Notes Archive

Purpose

The Release Notes Archive serves as a comprehensive and transparent record of all modifications made to our product. It is designed to provide our valued customers with detailed context and insights into the evolution of our software, including all updates, enhancements, and bug fixes.

Archive Structure

Each entry in the archive corresponds to a specific product release and includes the following key elements:

- **Release Version:** A unique identifier for the specific product release (e.g., 1.0.0, 2.1.5).
- **Date:** The date on which the release was made available to customers.
- **Updates:** A categorized list of all changes introduced in the release, typically including:
  - **New Features:** Detailed descriptions of any new functionalities or features added to the product.
  - **Bug Fixes:** Descriptions of any resolved issues or bugs, often including references to the original bug reports.
  - **Improvements:** Descriptions of any enhancements or optimizations made to existing features or functionalities.

Notes

- The Release Notes Archive is intended to be a living document that is regularly updated with each new product release.
- Customers are encouraged to refer to the archive to stay informed about the latest product changes and to understand the context behind those changes.
- The archive may also be used by internal teams, such as support and development, to troubleshoot issues and to track the progress of the product over time.
- In addition to the categorized list of updates, some entries in the archive may also include additional notes or details, such as known issues or limitations associated with the release.
- The archive may be organized chronologically or by release version, depending on the specific needs of the users.
- The level of detail included in the descriptions of the updates may vary depending on the

complexity of the change and the target audience.

Disclaimer: The information contained in the Release Notes Archive is subject to change and may not be accurate or complete. Customers are advised to contact our support team for the latest product information and support.
